

Transcribed Data Part 1

Due: Friday, 3/10, on D2L by class time (9 AM)

Grade: 100 pts (2% of grade)

Assignment

The purpose of this assignment is to practice identifying a communication practice from your audio and video recordings of participant observation (NOT from your interviews or focus groups) *and* transcribing this data.

In one paragraph, describe the data that you chose to transcribe. First, state what communication practice your data is an example of – this will probably be the same practice you identified in your bracketing and interview assignments. Then, using Goffman, state how you identified the beginning and end of this particular practice in this particular conversation. Afterward, provide some context – who is talking, where, during any particular event? This paragraph should be double spaced.

Then, provide your single spaced transcription of the data. You should transcribe **NO MORE THAN 1 page**. To transcribe, insert a table into Microsoft Word with 3 columns: column 1 for line numbers, column 2 to name the speaker, and column 3 for the transcription. It will look more or less like a script. Use the transcription conventions from either of the websites below to transcribe your data:

- <http://www.sscnet.ucla.edu/soc/faculty/schegloff/TranscriptionProject/>
- See PDF on D2L for another resource

Ideally, this set of data will be used in the ‘analysis’ section of your full research paper, so choose wisely.

Requirements

- 1-2 pages – double spaced intro paragraph and single spaced transcript, Times New Roman, 12 pt font, 1 inch margins
- **TURN IN A COPY OF YOUR ACTUAL RECORDING**
- Paragraph is clearly written and cites Goffman.
- Transcription follows three column format and uses appropriate conventions from the websites
- Cite quotes or ideas from the reading with the author’s last name and year published
 - For example, Goffman (1981) states we can identify practices through....
 - **DO NOT INCLUDE TITLES OF READINGS**
